

SE 216 – SOFTWARE PROJECT MANAGEMENT
PROJECT RISKS DOCUMENT

PROJECT NAME: Servicify

GROUP MEMBERS: GROUP 1 (Barış Can Ceylan, Alperen Demirezen, Ege Sezak, Yasin Kızıltaş, Buğra Yurtsever)

LIKELIHOOD RANK	RISK DESCRIPTION
1 Communication Issues	When designing software, there may be communication issues between different developer groups. These groups may think they understand each other but their visions may be vastly different.
2 Integration Challenges	When planning a complex software with a large range of features, there can be several issues while combining different parts of the program together.
3 Software Problems	Problems that developers might encounter during the process of the Software.
4 Inadequate Planning	If the project is planned by inexperienced people or simply by unforeseen consequences, the project may cost more time and money.
5 Infrastructure Problems	Hardware failures, network outages, or data loss.
6 Cyber Attack	Since the app will hold personal information and other useful information, it is a prime target for criminals.
7 Legal Issues	Changes in regulations, licensing issues, or copyright infringements.
8 Staffing Shortages	If the numbers of employees are not enough to run the business properly, it might be risky for the future of the company.
9 Company Leaks	The leaking of internal documents or source code of the project.
